About INOV

INOV - INESC Inovação is one of the largest Portuguese R&D infrastructures dedicated to innovation in the areas of ICT and Electronics.

A private non-profit institute that fosters relations between Higher Education Institutions and society and the economy, with a view to increasing their competition.

How it works

- This WirelessFinder aims to help First Responders (FRs) in search and rescue operations
- In scenarios where victims can be trapped under snow or under debris
- Intends to improve the FRs' operational efficiency in search and rescue activities by detecting victims that use gadgets, namely smartphones and smartwatches.
- Detection of devices through Wi-Fi and Bluetooth wireless technologies
